LIBERATE SHOWCASES ITV SOLUTIONS, CONTENT AND DEPLOYED SERVICES AT IBC

Leading provider of iTV middleware to cable network operators demonstrates new advances in MHP, SMS, double-byte and more

IBC Hall 1 - Stand 1.510

IBC - AMSTERDAM, NETHERLANDS - September 14, 2001 - Liberate Technologies (Nasdaq: LBRT), the premier open software platform for enhanced television, will showcase a broad range of content and technology solutions at the IBC conference and exhibition, September 14 - 18.

From the latest TV portals and Liberate® applications, to full MHP and double-byte support, Liberate exhibits the end-to-end solutions network operators need to roll out and run interactive TV services efficiently and profitably. All demonstrations listed run on the standards-based Liberate TV Platform™ software.

The Liberate TV Platform software is a leading solution for enhanced television around the world on digital set-top boxes. Liberate's premier list of customers includes AT&T Broadband, Cable & Wireless Optus, Comcast, Cox, Insight, ntl, Ono, Telewest, and UPC.

Liberate Solutions

Multimedia Home Platform (MHP) - Philips Digital Networks and Liberate Technologies show for the first time an open standards-based software platform integrating MHP and the Liberate TV Platform software.

Digital Video Recording - Liberate brings the convenience of VCR control to the digital set-top box - pause, play, record, fast forward and rewind favorite broadcast TV programs.

Double-Byte Support - Liberate showcases double-byte support for Asian and other multi-character language applications and programming.

Motorola Dvi5000 - For the first time Liberate's latest line-up of applications are being publicly shown on the Motorola Dvi5000.

Liberate Applications

Liberate TV Ticker™, Liberate TV Mail™, and Liberate TV Chat™ - Liberate shows the range of applications that enhance digital interactive system offerings, and are

currently running at network operators headends around the world.

Enhanced Application Template - Liberate displays a new client application template: using an easy to use main screen, consumers can select various broadcast television channels, content or services pages at the click of the remote. This intuitive navigation model puts the power in the hands of the TV viewers.

SMS text messaging capabilities - Liberate showcases SMS instant messaging on the TV screen. An address book and mini keypad lets TV viewers write simple text messages that can be sent to multiple users' GSM phones simultaneously, exemplifying the possibilities of developing for networks integrating both digital television and SMS.

PopTV Content Partners

Liberate's PopTV™ Program is the largest partner program in the world for interactive television. PopTV content partners show the hottest new content for TV - tailored for local markets. Demonstrations include TV Spielfilm's **Electronic Program Guide** (EPG) and magazine in German language from Gist; **interactive ads** from RespondTV; **games** from Two-Way TV; and **walled garden sites** from music icon MTV in English, and Fresh-IT in Spanish.

Liberate in PopTV Partner Stands

In conjunction with its PopTV Program, Liberate demonstrations will also be shown in a variety of partners' stands, including **Broadcom** (Stand 1.577), **Cisco** (Stand 12.241), **Concurrent** (Stand 5.238), **Harmonic** (Stand 1.361), **Lysis** (Stand 1.411), **Motorola** (Stand 1.381), **Ncube** (Stand 12.131), **NDS** (Stand 4.111), **Pace** (Stand 1.131), **Philips** (Stand 8.379), **RespondTV** (Stand 5.339), **Scientific-Atlanta** (Stand 1.379), **SeaChange** (Stand 8.389), **Tandberg** (Stand 1.421), and **Thomson** (Stand 8.171).

About Liberate Technologies

Liberate Technologies is the premier provider of open platforms for delivering enhanced content and services to television viewers around the world. Liberate's software, based on Internet and broadcasting standards, is the infrastructure platform supporting digital consumer services delivered by cable, satellite and telecommunications companies. Headquartered in San Carlos, California, the company has sales offices in the U.S., Canada, Japan, and the U.K.

Liberate and the Liberate design are registered trademarks of Liberate Technologies. Other marks used in association with these registered trademarks (including Liberate TV Platform, PopTV, Liberate TV Ticker, Liberate TV Mail, and Liberate TV Chat) are trademarks of Liberate Technologies. All other trademarks are the property of their respective owners.

Safe Harbor Statement: Any statements above that involve expectations, intentions, or strategies are forward-looking statements that involve risks and uncertainties, are based upon information now available to us, and are not

necessarily subject to update. These statements are not guarantees of future performance, and actual results may vary materially. Our filings with the Securities and Exchange Commission (including our most recent annual report on Form 10K and quarterly reports on Form 10Q) discuss risks that could contribute to such variations or otherwise hurt our business.
