Christmas just keeps getting better and better ☺

Just the ability to read cards keys is an awesome thing ☺ It will be nice to be able to upgrade receivers, or replace a bad one. ☺

Very well indeed...I just tried talk31 and yup..it does read box keys and key0/1. But now what can we do with 3m code post above?

I tried to make a hex file with it but it does not load into buffer with mcg303...it gives checksum error..at least I tried!

It keeps getting better and better..ho ho ho

Hmmm...

Looks like business is about to pick up.

Me also thinks some V3 customers are going to be in need of unlooping services soon ☺

Happy Christmas...

Funny how great stuff like this starts showing up just as one of the "new echo groups" is getting ready to sell a new kind of programmer (check out hitec's site). Pure coincidence I'm sure
