hello don...  
had a lot of time without knowing about you ...  
down the gla cardmaster and you didn't help me  
buy another file. :-(  
I would like to buy the ird and card  
but it is a lot of money  
maybe could buy 50  
and doesn't the program sell it to me??  
if the cards fall , would have many problems with the 100 clients  
more better to have the soft and to work express for the clients.  
won't I have problem in getting you if the cards 3m fall??  
I wanted to have security of support backup  
your understands me??  
put card you sendme in this name and address

No, I have agreement not to hack their system...well I should say agreement is being discussed.

I have not signed anything yet.

They know I can be dangerous so they want an agreement that if they quit sueing me I will quit hacking them.

This is what the agreement when signed would be.

Bill,

As you know, I have attempted to get in touch with you for several days. You wanted me to get back with you on Matt's progress up to now on the unlooper and I have tried to do so unsuccessfully.

Needless to say, it appears that you are avoiding contact with me. What is your problem?

If you feel guilty about something or you're trying to hide something, I already told you I don't give a shit how much you make or how many units you sell. All I want is future support for the 3m's. If I can't have a solid assurance of that, then I have to explore the option to have someone else work with the software to provide it to me. I got your source code for you with the assurance that there was going to be a big future sale to JT Tech. That never happened or at least, it didn't happen for me. Again, I don't give a shit. I have the assurance of Matt that the P4 will be done and done quickly when it is released.

All I have, is a few small dealers wanting to sell a few units and the assurance that they will be taken care of with new files if they get hit. If there is going to be any problem with that, let me know.

It IS important that you get in touch right a way.

Don

Hi Don. Nope, as usual just more bullshit. We are still working on it though. Now we are able to dump looped cards almost at will in 3-4 seconds, have been able to fix 9 cards so we are getting something accomplished. Very little mind you, but it's something. Trying to figure out what to write to the card is the difficult part at this point. I'll let you know when we get something substantial.

Bye for now.

DirecTV Swaps Smart Cards

By Monica Hogan  
Multichannel News  
4/2/2002 4:34:00 PM

DirecTV Inc. said Tuesday that it has begun distributing replacement smart cards that provide conditional access to programming for its more than 10 million direct-broadcast satellite customers.

The swap-out marks the fourth-generation of smart cards since the service launched in 1994.

The company also confirmed that it will transition its conditional-access technology away from its initial provider, NDS Group plc, and take it in-house. DirecTV's engineers were largely responsible for the new smart-card design, spokesman Bob Marsocci said.

NDS said in a statement Tuesday that DirecTV began the transition to its own technology Monday. It added that the companies contract remains in force until August 2003, and NDS will continue to generate revenues from its DirecTV relationship until then.

DirecTV plans to mail more than 15 million smart cards over the next six months. It has set up a dedicated on-air channel to instruct customers how to replace the cards in their DBS receivers.

Periodic smart-card swap-outs have become mandatory thanks to aggressive DBS-signal pirates who alter smart cards that allow them to access programming, including seasonal sports networks and pay-per-view movies, free-of-charge.

Electronic countermeasures sent via satellite have helped to curb, but not eliminate, the piracy.

Hi Don

We are actually making a bit of headway on new one. Since the P3 info is all out now, maybe Brian could explain how he dumped the P3, did he just glitch it? The P4 is very hard to glitch with all the protection they built in, but there is some info coming out with a deep cycle digital glitcher. We were hoping that possibly Brian would share the idea he used on P3 even though we are sure it is of no use on new one. Just one of those things Chris would love to know, he thought it must have been a cool idea.

Also don't believe any of the shit on the net Hitec is flapping about, pure bullshit. Both Chris and I have an agreement "not to hack NDS" but this new card is completely controlled by DTV, NDS is out of picture.

I would also trust you keep this very confidential, some people would love to know we are playing again.

The needle station we are using was for chips like P3 but P4 is even smaller, but we are getting places with it. Between the 2 techniques I think we can get most of it.

Hello...

Sure can send you a card. Give me an address. As far as SKY, we will need some more samples and should be able to do them quickly as they are almost identical to GLA.

We shouldn't ruin the samples but can not promise that we won't. I don't think we will though.

As soon as I get an address, I'll send a sample.

Don

OK Max,

Now, this is directed at YOU. I have tried to be a go between involving these cards and I have tried to keep both sides running smooth. This is NOT working. I am under constant stress from you and from Matt and I am NOT going to let this ruin my health for all the FUCKING MONEY in the world.

If this does not get straight this weekend, I WILL put it on the web out of the Bahamas and sell the cards to the consumers direct for \$400.00. NO FUCKING DEALERS!!! I have had my fill of dealers with Canada and now with this experience. Yes, I know there was trouble with the cards as far as the guide byte BUT we WERE told to go ahead and you would use the sleeves. I also know there was a slow start but I was responsible for that because I did not want the failure rate to be so high that you could not make money, so I slowed everything down and spent over \$77,000 on more equipment. If you are even poor at math, you will see that this has not been recoved still and we are in the 4th or 5th week of this shit. Matt WILL quit soon so I must either buy up the cards and sell them on the net or you had better get your ass in gear. I am not bullshitting on this to get you going, I am making a promise of what I am going to do. I have dealt with you in the past and the results where that you made a lot of money off of a file you should never have had. You lied to me and finally quit returning my calls. I went into this, this time, with a positive attitude that you could follow through on the 15 MILLION cards that are out there and now I have to beg to get cards sent and for some strange reason, RAIN, SUNSHINE, FOG or some other goddamn reason, they never show. I am getting tired of YOU and MATT and I want this over FAST. Either you take the lead or I WILL!! Now, this is not Matt talking on some manic/depressive condition, It is ME and I will GODDAMN do what I say. I always have. I am tired of this fucking stress and I will end it. I can buy the cards from him for \$100 and sell them for \$400. It doesn't take a rocket scientist to see that only about 3000 cards are needed for the million. That's a LOT LESS than 10,000 so you do the math and figure what you want to do. I want some answers TODAY.

Hello Federico,

Thanks for the information on Monday. I will come down and spend the night. I understand with you coming home after a long absence that it will take some time to recover and I want to thank you for working so fast.

No, Brian does not have an iron heart. He has NO heart. I have never met a more suspicious, uncaring, selfish, no good son of a bitch in my entire life. He has not sense of RIGHT. Bad things always happen to him. Now, I know why. Because he is ALL bad inside and out. But, we must wait like little men waiting for the King to decide what he wants to do. I called his dad today and he said that he had not heard from him for a few days but that Brian mentioned going to Cancun for a couple of weeks. I don't know. He just disappeared a few days ago and I have not been able to reach him. I have left messages on his cellphone on the internet and today I sent a FedEx to his house with a message in it.

I will be in Russia for only 6-8 days and I am not leaving until the 4th. Maybe we will hear some good news (for Christmas) by then. I have always been lucky this time of year and I hope it is the same this year!!

Yes, I know about the offer to provide us with the method of getting into the card. Rod told me two or three days ago. I am VERY suspicious about this offer and I think it might be a sting operation. That is when I was trying very hard to get in touch with the King.

I know one thing. He is getting LOW on money so he will surface soon. If he is in Cancun, he will be totally out of money when he comes home because he always takes two or three people with him. He has NEVER bought me a breakfast, lunch or dinner but he will blow money on kids to impress them. Someday this will all stop for him and he will find himself out of money and "so called" friends. I look forward to that day!!

If I hear, you will be the FIRST to know. I promise.

Regards,

Don

Well the P4 and the Rom104 are looking very appealing at this point. I have some really nice FIB pictures of the Rom104, but have mostly had someone just try glitching P4, have to glitch ATR and also need different glitcher.

I am thinking of labbing it, can B do any of this stuff?

Later

Doc,

Glad to here all's well Doc, I wasn't sure where you were from but I knew it was somewhere down south

I really haven't done much since you left either Doc I was just hoping something would come up but hey. But your right Doc there sure are a different breed out there and just aren't worth the hassle, Not sure what type of work you do Doc But if there is EVER anything I can do to help in Canada Please call me Take care and glad to hear all's well Please stay in touch who knows maybe someday we may even meet Later Doc

Fred

Pretty quiet here, but I do believe some things are getting done.

Whats keeping you busy these days?
