<Traun> he said Yianni told him

[23:17] ==ToRqUe== PRIVMSG - paul-e: Oooopppsss.....b4 you nuke the 60 nano's...

<Arthur> We were chattin bout that last week

<Arthur> I might have mentioned something bout those cards

<Arthur> not sure

<Arthur> it wasnt meant to go back to you however..

<Arthur> you know..chit chat

<Traun> whatever...you know anything anyone says gets back...it was probably meant to discredit...but whatever

<Arthur> hey are you sure your card is undumpable

<Traun> no

<Arthur> no.

<Arthur> i didnt say it like that to discredit you

<Arthur> I was saying to him how I dont talk to anyone in north america now on

Arthur

anything
<Arthur> and that we dont do anything either
<Traun> no I never said it was undumpable
<Arthur> and then I said, I thought I was loosing too much money
<Traun> everything is dumpable
<Arthur> and mentioned that..
<Arthur> right!
<Arthur> my box will dump it
<Arthur> hehe
<Arthur> when i finish
<Traun> loosing...what the fuck did you loose
<Arthur> if I ever get around to finishing it
<Arthur> the 1k on those cards
[23:19] ==Torque== PRIVMSG - paul-e: The update pkt's will re-enable some of the sub-nano's so it needs to be loaded b4 the 60 is nuked.
<Arthur> for example..
<Traun> I paid for A box i couldn't do shit with
<Arthur> you burned people
<Arthur> alot of people
<Traun> who...name one
<Traun> one
<Arthur> probably copied the code into software (with castor)
<Arthur> and got rid of dungle
<Arthur> hehe
<Traun> never used the code
<Traun> found the door
<Arthur> k
<Traun> code meant shit...everyone has code
[23:21] ==Torque== PRIVMSG - paul-e: I'm off to bed...If you have questions, i'll be home till 8am in the morning..
<Arthur> not that code
<Arthur> that was special
<Arthur> it was the only one with limits
<Arthur> and ratings
<Traun> why...its down isn't it
<Arthur> now the world has ratings
<Arthur> you didnt notice this yet?
<Arthur> all these shitbirds have working limits and locks now
[23:22] ==Torque== PRIVMSG - paul-e: Ok...lt&r
<Traun> yes everyone does...so what was so special about it
<Traun> lots of people read it
<Arthur> k
<Arthur> no probl
<Traun> I didn't notice what yet?
<Arthur> who knows
<Arthur> i dont care
<Arthur> you guys let me down
<Traun> And you said I burned people...I would still like a name..
<Traun> how is that
<Arthur> i never said that
<Arthur> tell me who told you i said that?
<Arthur> Ohh
<Traun> Its always you guys....i fought for you and got you what little you did get
<Arthur> I meant, "burned cards to people"
<Arthur> Yes. Thanks
<Traun> Yea like 150-200
<Arthur> You took your pot of gold on v3
<Arthur> it was the least you could do
<Traun> Pot of Gold?
<Arthur> while you built batts and sold them up till the end for 600\$
<Traun> I took the shit for v3
<Arthur> you and Joe in Calgary
<Arthur> he bought a new truck

Arthur

<Arthur> tried to open a shop
<Traun> bullshit...try 50.00
<Arthur> couldnt get any credit
<Arthur> hehe
<Arthur> joe sabo
<Traun> yes Joe Szabo
<Arthur> you think he made over 10k?
<Traun> bought a truck ...opened a shop after selling 600 bats before you ever
appeared
<Traun> yep I do think he did
<Arthur> then why did bg get only 4.7 from him?
<Arthur> Hmm
<Arthur> interesting
<Arthur> anyway
<Arthur> old news
<Traun> you asked for 20k...you made atleast 60k
<Arthur> ??
<Traun> no no try 9k - 11k from him
<Arthur> I never asked for shit
<Arthur> you offered this
<Arthur> anyhow
<Arthur> the deal later was changed
<Arthur> it was 50/50
<Traun> to what
<Arthur> 15/15
<Arthur> zor says you have a batt coming out
<Arthur> congrats
<Arthur> your' late now though
<Arthur> p3 = January I am hearing
<Traun> its pretty hard to control it..when guys like reggie were dumping it and
guys like Magi were selling it
<Arthur> I called dtv to ask them where the fuck my statements were for the past 3
months and blah blah blah
<Arthur> and the little bitach
<Traun> I did my best at it and had court fights and pressure to deal with...I tried
my best and I always tried to get you the best I could for future etc....sorry if it
fucked up but I wa trying
<Traun> not really a bat card...emu pcb
<Traun> castor said you gave him the way in that you used on the programmer you sent

 <Traun> Oli said you didn't have to remove gold mesh from Echo to read but my guy
 got it removed...said it was hard
 <Traun> f84
 <Arthur> Hmm.. Mesh?
 <Arthur> You are getting confused
 <Arthur> There are two things on that chip
 <Arthur> a mesh and a gold covering
 <Arthur> the covering is nothing
 <Traun> the mesh is what is removed
 <Arthur> the mest is a field underneath acting as the passivation layer
 <Arthur> kewl
 <Arthur> This should have been done months ago dude
 <Arthur> you sure no one else hasnt already popped it!?
 <Traun> well some things just take time
 [21:13] --ToRQue-- PRIVMSG - Vett: my site is ip checking but I gave you access on

Session Start: Mon Nov 30 22:28:31 1998 Arti

<ARTi> yo
<Traun> hi
<ARTi> hi
<ARTi> how you been
<Traun> good
<ARTi> kewl
<Traun> the new .00 box is scary
<ARTi> i just got coolboards 3
<ARTi> wicked
<ARTi> i am working on one too now
<Traun> Yea i have it
<ARTi> not for un00
<ARTi> to dump any cards
[22:30] --ToRque-- PRIVMSG - VeTeR: you know what I mean
[22:30] --ToRque-- PRIVMSG - VeTeR: hehe
<Traun> I dumped every card on the planet except EMU
<ARTi> wicked
[22:30] --ToRque-- PRIVMSG - VeTeR: Arti chat you yet?
<ARTi> emu doesnt run normal then
<Traun> he must have fucked up prom
<ARTi> when i am done i can dump emu most likey
<ARTi> i am glitching the header loop
<Traun> Norms card is interesting
<ARTi> the emu will surely 'head' there., hehe
<ARTi> which one is this?
<Traun> I don't know
<Traun> just his card
<ARTi> hehe
<ARTi> hows your e* shit coming
<Traun> I don't know what it is called
<Traun> I have put on back burner...very litle market and I heard nes of big time heat on it
<Traun> nes=news
<ARTi> oh.
<ARTi> because it has the sister system in ca?
<ARTi> hmm good point
<ARTi> more worthwhile though
<ARTi> there is a strange packet coming down once or twice throughout the day that keeps locking up my logger
<ARTi> it is not signed for a p1 or p2
<ARTi> I am serioulsly considering it a p3 packet?
<Traun> what is more worthwhile
<ARTi> Its wierd and like you said, its overdue in a sense
<ARTi> i am just fucking busy still with work
<ARTi> and just came back from europe
<ARTi> you think they are isuing p3s yet? have you heard anything on this?
<Traun> we are doing better with 00 fix then any programming can possibly do
<Traun> have not heard of it
<ARTi> good sign then! its probably just a fuck with a tech guys head
<ARTi> you know someone who understand s things
<ARTi> still
<ARTi> scary th9oght
<ARTi> i dont want to see the 3rd card
<ARTi> sky 11 still has no enabled cards i know of.
<Traun> It will happen for sure
<ARTi> apparently what i saw there in swiss was transferred cards
<ARTi> you know, like p1 -> p2
<Traun> its the legal thing holding them back
<ARTi> at least we will know the new chip
<ARTi> hehe
<Traun> I guarantee P3 will get popped
<ARTi> yup

Arti

<ARTi> but two chips integrated is a problem
 <Traun> maybe...dunno...I'll leave that to the brainiacs
 <Traun> You should see this dvce...burn whole image in 4 seconds
 <ARTi> for kewl
 <ARTi> he goosed the clock
 <ARTi> for sure
 <Traun> reads in 2
 <Traun> did you see the new Motorola phone yet
 <Traun> 1/2 the size of star tac
 <Traun> did you get BNG dump yet
 <ARTi> yeah
 <ARTi> hehe
 <ARTi> eddie sent it
 <ARTi> no
 <ARTi> have been in europe
 <Traun> yea he sent to everyone
 <ARTi> funny
 <ARTi> i just installed the new novell client and got long file names working
 <Traun> i don't think so..It's spitefull and childish...so eveyone's card dump will
 be on net
 <ARTi> 99king
 <ARTi> wake up
 <ARTi> you loose cannon
 <ARTi> yes it is
 <ARTi> still
 <ARTi> they (ndc) dont need the dump to kill this kind of cards
 <ARTi> they can scramble in the ppv (the only choice actually)
 <Traun> the only guy he is hurting is wheels and all his customers
 <ARTi> remembver.. this is why the need for a bat card exists
 <ARTi> right
 <Traun> look at Normie's code...don't need a bat
 <ARTi> no what i mean is
 <Traun> its pretty cool
 <ARTi> rem the 248
 <ARTi> 251
 <ARTi> etc..
 <ARTi> they could scrabme us anytime
 <Traun> yes...but track record is every 3 months for ECM...bats could be everyday
 <ARTi> scramble on a known 00 area in the ppv area (where the spoofing isnt done)
 <ARTi> ah
 <ARTi> true!
 <ARTi> a scrabmle though is like the P1v3 days
 <Traun> i understand they put alot more code in for a bat card this time
 <ARTi> no
 <ARTi> bullshit
 <ARTi> the asic is only thing
 <Traun> really
 <ARTi> yeah
 <ARTi> ask normie
 <ARTi> they just need to take each byte from 40 pack and put through the kernel()
 function
 <Traun> haven't spoke to him in a long time
 <ARTi> and init the asic in beginning and then in end
 <ARTi> and voila
 <ARTi> but the asic is a problem
 <ARTi> since its on the card still
 <ARTi> hee
 <ARTi> hehe
 <ARTi> i never really played around to tap the asic much
 <ARTi> lack of time i guess
 <ARTi> well, i had enough in here for a night!
 <ARTi> later
 <Traun> later

<ARTi> Hey

<ARTi> wheres my batts

<Traun> where is my software (support) I paid for

<ARTi> dude.

<ARTi> you sold many copies

<ARTi> ok

<ARTi> i see

<ARTi> why is plamen using an atmel now? I turn him onto something newer than a pic?

<Traun> ask him...he never seen any of your stuff ...ever.

<Traun> very few copies...wouldn't write to any cards

<Traun> See something you have to understand while your feeling so cheated or under egoed...you did a good job on the bats except for sending code to NDC to shut it down all the time.Pman dumped the card...fixed the 99 fixed the 00 and what did you offer to 1 up any of that. I gave you money up front for some software that wouldn't really do any cards unless thay had 12 updates or less and you say I made a million off it...I said find some of those million...you never have! all IRC rumour

<Traun> I know you did Echo...but what is Echo..1-sports channel and very few anything else...its hard to market...but then instaed of thinking it out...you put it on the net.Why I have no idea...praise maybe? Your a good programmer..you just have to learn to be a little more in your chair and think things out without telling the world, and you'll be fine.

<ARTi> whatever

<ARTi> i didnt do echo

<ARTi> dont say that

<Traun> its your code dude to the T

<ARTi> what the fuck are you talking about?

<Traun> whatever is a bad answer to what I said.

<Traun> Charlie is big friends with Norm...he said they know its you and someone else

<ARTi> yeah yeah yeah

<ARTi> whatever

<ARTi> i dont give a rats flying fuck

<ARTi> maybe he should hire me then

<Traun> well...just what I heard...take it as you wish

<ARTi> sure

<ARTi> you're telling stories again ron

<Traun> go ask for a job

<ARTi> please.

<ARTi> dont come in here and try to scare me.

<ARTi> i am doing nothing wrong

<Traun> don't be scared

<ARTi> its so easy to point fingers

<Traun> just careful

<ARTi> your just pissed cause pman couldnt dump it

<Traun> he hasn't tried

<ARTi> yes he has

<Traun> not a priority

<ARTi> i know he has

<ARTi> i have friends too you know

<ARTi> you told me you spent koin

<ARTi> good

<ARTi> i wish i had the coe

<ARTi> de

<ARTi> code

<ARTi> i know what to do with it

<Traun> he has no datastream ... no needles..how can he dump from there

<Traun> when he gets here it will be a different story....he does have rom ...but has done nothing with it yet...he needs eeprom

<ARTi> sure

<Traun> Yea i know what you'd do with it...put it on the net

Arti

<ARTi> no one seems to do anything
<ARTi> huh
<ARTi> i wish someone passed me the rom
<ARTi> i would make something
<ARTi> i dunno
<Traun> maybe you did put P2 on net I don't know...I was just the guy trying to
convince everyone you wouldn't
<ARTi> ok
<ARTi> whatever
<Traun> you want the rom?
