The code is not part of the smart card.  
Might be IRD. If at all.

The IRC channel known as "#dishnetwork" which deals with hacking of EchoStar announced the presence of a web-page, but does not provide explanations.  
However when going to this web-page (<http://www.dishplex.com/dishdocs/eroms.txt>) it appears to display code-portions which, based on the title, could be portions of the EchoStar ROM?
