Also try Merlin 2.5 to clean the cards. I've had many cards with a bad 4th byte & atr of 00 when using extreme Hu. When i've used Merlin it has almost always cleaned the card for me. Hope this helps.

Hey dragon YGM. Just use the cleaning utility & check off problem card
if it does not work the first couple of times.

Topic: h card fix
From: heavy
IP: 205.188.197.151

DB, I put the bs H fix on my non BS card when it first came out. I figured I would give it a try & see if it works. Now I'm not saying that this is the right thing to do, but my card has been up since without a glitch.

Subject: BS H Activation
From: heavy
IP: 64.12.104.53

I have spent a lot of time searching but can't find an activation script for a BS H at 67. I have found 1 for a non BS H. If someone could PM me the file or point me in the right direction if a script even exists. Thanks.

***** Post #8

Date: Fri Jan 18 02:17:25 2002
Forum: H & BS H Files
Topic: New BS H Fix
From: heavy
IP: 152.163.201.209

Has anyone else had a problem loading this script. I did 3 cards with this fix & it looped them. I unlooped all of them and tried another fix that is out there & had no problem. I don't know if it is just me or what but 3 cards with the same result seemed strange.

I don't think it ever did. I tried it right away with many different H 3m's & it always would freeze up. I think unless you had a 3m to get around the 2-1 hashing that's what you got.

I just had a question Kyle. Why would it matter if you had the phone line connected after you read card & put back in ird? The only thing you are doing to the card is checking the card info. If I'm wrong please let me know.
