Summary:

- Gold Satellite (<http://www.goldsatellite.com>) sell E+ E3M cards for USD 75. No details given about the source of their patch and if it is proprietary or not. [Ref. 1]
- Iceman seems to have a lot of trouble with fixing the cards and the receivers altogether. [Ref. 2]
- The update that has been made on the DNASP003 didn't generate much feedback. There is no feedback at all on the forums and there are a couple of people on the IRC who had issues with getting their cards to dump. It's not a bad thing since this update was supposed to be as stealth as possible. I will keep on monitoring and for sure there will be more comments about this tomorrow. [Ref. 3]

Devices' status

DNASP002 : Compromised. Firmware available. Many cards dead.
 DNASP003 : Secured. VIP rights in some cards. Blocked cards not affected by the update.
 DNASP010 : Not compromised.
 AVR3/blocker: Working (MCG 3.05).

Dealers' status

KoinVizion : Moving web site.
 E3MCards : Site closed until new ISP is found.
